

LEADING SHIP YARD
IN THE ARABIAN GULF SINCE 1977

ASRY SHIP REPAIR

ASRY's core business since launching in 1977 has been its ship repair operations. Beginning with the drydock, followed by the floating docks, slipways, and over 4km of alongside berth space, ASRY now has a leading variety of facilities to repair practically any size and type of vessel. The yard is trusted by some of the most prestigious names in the global shipping industry and is capable of repairing any type and size of marine vessel, from workboats, to containerships, VLCCs, cargo vessels, ro-ro vessels, bulk and cargo carriers, chemical carriers, and more.

ASRY NEW CONSTRUCTION & ENGINEERING

This is a dedicated division comprised of a team of engineers, naval architects and senior yard managers, providing construction, engineering, design and consultancy services on a global basis. Drawing on 35 years of successful yard management expertise, ASRY has a growing newbuild portfolio including offshore support vessels, harbour tugs and specialized barges, as well as turnkey engineering packages including ballast water monitoring systems, and low-sulphur emission systems.

WORKSHOPS & SERVICES

ASRY boasts one of the most comprehensive workshop portfolios in the region, including dedicated shops for:

1. Refurbishment and machining operations
2. Mechanical overhaul & rebuilding
3. Hydraulic Engineering
4. Rudder, propeller & drivetrain servicing and overhaul
5. Pipe fabrication
6. Steel and Boiler servicing
7. Electrical & instrumentation installation fault finding and repair
8. Lifesaving & firefighting appliances servicing and repair

DRY DOCK (Dock No.1)

ASRY's No.1 Dock is the yard's largest, and the region's most experienced, having hosted some of the world's largest ships.

Capacity:	500,000dwt
Overall length:	375m
Overall width:	75m
Multiple dockings:	Yes
Draught:	8.5m (9m below chart datum)
Draught max:	10.4m (tide dependant)

QUAY WALL

The most recent addition to the 4km total berth space of ASRY is the new 1.38 km Quay Wall, which gives ASRY almost unlimited flexibility to accommodate all client timeframes, through detailed scheduling and expert berth management. With an alongside depth of 10m, the quay wall, can simultaneously handle three 300,000dwt vessels, and is ideal for alongside repairs, steel work, upgrades, and blasting and painting scopes. The large amount of space and dedicated infrastructure also makes the quay wall well-suited to longer-schedule projects.

SLIPWAYS

ASRY's twin slipways, each with a dry berth length of 255m, are ideal for accommodating offshore service boats, supply boats and general cargo vessels up to approximately 15,000dwt. Vessels with a draft up to 4.5m can be slipped under normal tidal conditions. ASRY's slipways have grown to become the most popular mid-range dry berths in the region, and added a further dimension to the yard's space, flexibility and overall variety of repair possibilities.

ASRY OFFSHORE SERVICES

One of ASRY's strategic diversifications is its dedicated offshore oil and gas division. Specialising in offshore rig repair and fabrication work, the Offshore Repair division is an integral part of the yard's capabilities. Having repaired several major rigs, including the largest rig in the world at the time, Bob Palmer, the division has the capability to handle any offshore platform structures for either repairs, component construction, mobilising a skilled 'riding squad', or surveying.

FLOATING DOCKS (Docks No.2 and 3)

ASRY has two floating docks to expand on the dry repair capabilities of the yard:

	Dock No.2	Dock No.3
Length	252m	227m
Width	44m	40m
Lifting cap.	33,000 T	30,000 T
Max Size	120,000dwt	80,000dwt

ONSITE SPECIALIST CONTRACTORS

ARABIAN PIONEER

ASRY is the Arabian Gulf's most experienced ship and rig repair yard. Founded in 1977 in Bahrain, ASRY has over 35 years of experience in marine asset optimisation. Its leading range of facilities includes a 500,000dwt drydock, two floating docks of 252m and 227m in length, 15 repair berths with a total length of approximately 4,000m, twin 255m slipways, as well as a full range of workshops and service centres. The yard's portfolio of capabilities is not only the largest in the Arabian Gulf, but also includes jack-up rigs and other offshore assets, due to a dedicated division – ASRY Offshore Services. Combined with a series of other diversifications including a New Construction & Engineering division, ASRY is the Middle East hub for marine expertise.
